

VISION

Local government is the arena where benefits and services are actually provided to the people, and it is the institution held most accountable for the performance and delivery of those beneficial services. Our local City-Parish government has a solemn responsibility to the people to foster and facilitate health, freedom, democracy, and corporate and private enterprise for the benefit of its people. Vision and foresight are required to be proactive in identifying future challenges and opportunities, while realism and character are critical in addressing the circumstances of the present. By promoting family strength, eliminating fear, and creating an environment where growth, development, prosperity, and security abound, this government will fulfill its responsibility.

MISSION STATEMENT

The mission of the East Baton Rouge City-Parish government is, first of all, to provide for the future without neglecting the present, resulting in a secure, well-educated, flourishing, vigorous community. The present threats to our freedom, liberty, and happiness deserve not only defense, but also prayer. This community has been and will remain in unity through these troubled times. This government will carry out the resolve of the people within our secure, righteous, and diplomatic community and provide safety, knowledge, and liberty for the pursuit of goals and dreams of all present and future generations. As a government, we will move expeditiously in meeting all of our goals, always knowing that the community's social, cultural, political, recreational, and religious interests depend upon effectiveness and efficiency in our government.
